

CORE ESSENCE ORTHOPAEDICS, INC. EXPANDS PRODUCT OFFERING TO ENABLE DEMANDING SURGICAL TECHNIQUES.

YARDLEY, PA, July 16, 2008 – Core Essence Orthopaedics, Inc., a medical device company, introduces a line of innovative surgical solutions focusing on soft tissue and skeletal repair of the extremities.

“Currently, we have FDA cleared products for the orthopaedic extremity marketplace as well as a strong pipeline of new products that will roll out later this year,” explained Shawn Huxel, CEO and President of Core Essence Orthopaedics. “We are focused on providing intuitive solutions to repurpose familiar surgical techniques. These enabling solutions facilitate minimally invasive and arthroscopic procedures.”

Core Essence Orthopaedics’ products include the SECURUS Knotless Suture Anchor System, initially targeted at arthroscopic rotator cuff repair. Other key products are the nABLE Percutaneous Suture Management System, PONTiS Endotendonous Repair System, reVERTO Shape Memory Staples, SEG-WAY Synchronized Endoscopic Guide System, and the reNOVO Suture Anchor System.

“All of our products are designed specifically for ease of use in high volume, minimally invasive or arthroscopic procedures,” said Alan Miller, Executive Vice President. “Core Essence Orthopaedics is focused on the needs of surgeons who serve the largest procedural segment of the orthopaedic market—the upper and lower extremities.”
